

EVOLUTION OF THE MOVEABLE HOTEL

OBMI's innovative, moveable hotel room – known as Habitäre – will redefine hospitality by granting access to the planet's most awe-inspiring, untouched destinations.

Constructed using ultra-lightweight and sustainable materials for easy installation that is light on the land, the modules feature customizable spaces that can shift to suit their surrounding landscape. The distinct, movable nature of our design will qualify rooms to be built without permits, granting access to unique landscapes, which would not be suitable for the significant development associated with traditional construction sites.

CONCEPT DEVELOPMENT

LIGHTWEIGHT MATERIALS AND FLEXIBLE SPACES

With customizable, non-binary spaces, rooms are enchanted and adaptable; inventive and flexible—transforming to meet your needs, wherever you are in the world.

KEY DESIGN CRITERIA

- Not attached to the land in order to allow for easeful moving to a new location.
- Low to no impact on the surrounding environment.
- Ultra-light-weight for low transportation costs, and ability to be built off-site.
- Generously sized units and unique end-user experiences that transcend the concept of "luxury."
- Establish a core design framework that allows for multiple aesthetics, variations and additions.

CURRENT PROTOYPES

TWO CUSTOMIZABLE CORE MODELS: SLIM AND WIDE

- Both the Slim and Wide models allow for multiple iterations, granting clients the capacity to curate their environment through a series of unique upgrade options.
- Each additional feature has been thoughtfully constructed to enhance unparalleled, immersive luxury and deliver a hospitality experience like no other.

OPTIONAL FEATURES

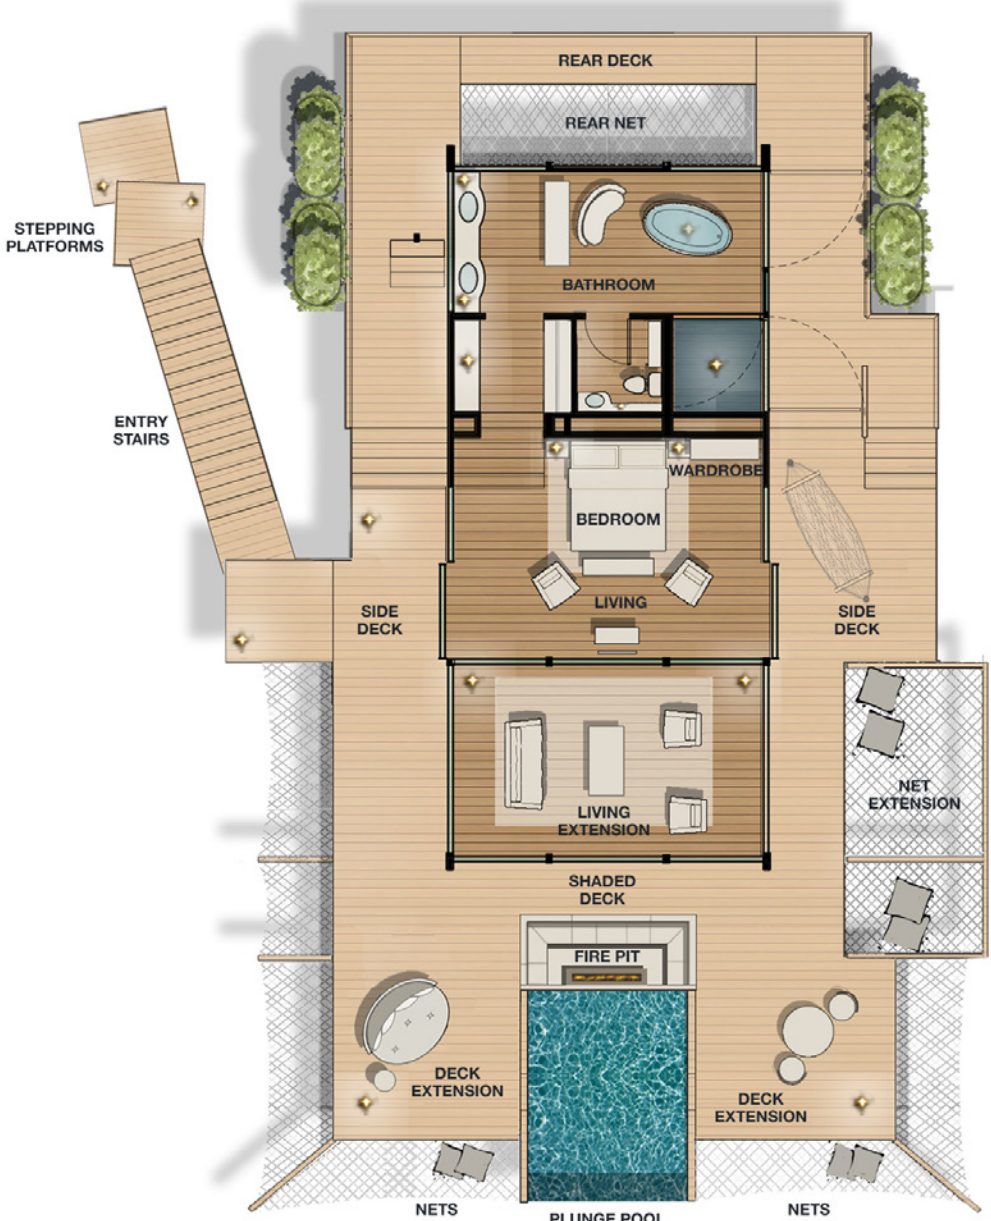

- 1 Expanded Decking
- 2 Plunge Pool
- 3 Firepit
- 4 Rooftop Vista

Our revolutionary design approach will allow spaces to be erected in 25% of the typical construction time frame at less than 1/3 of the cost. The sky's the limit—literally.

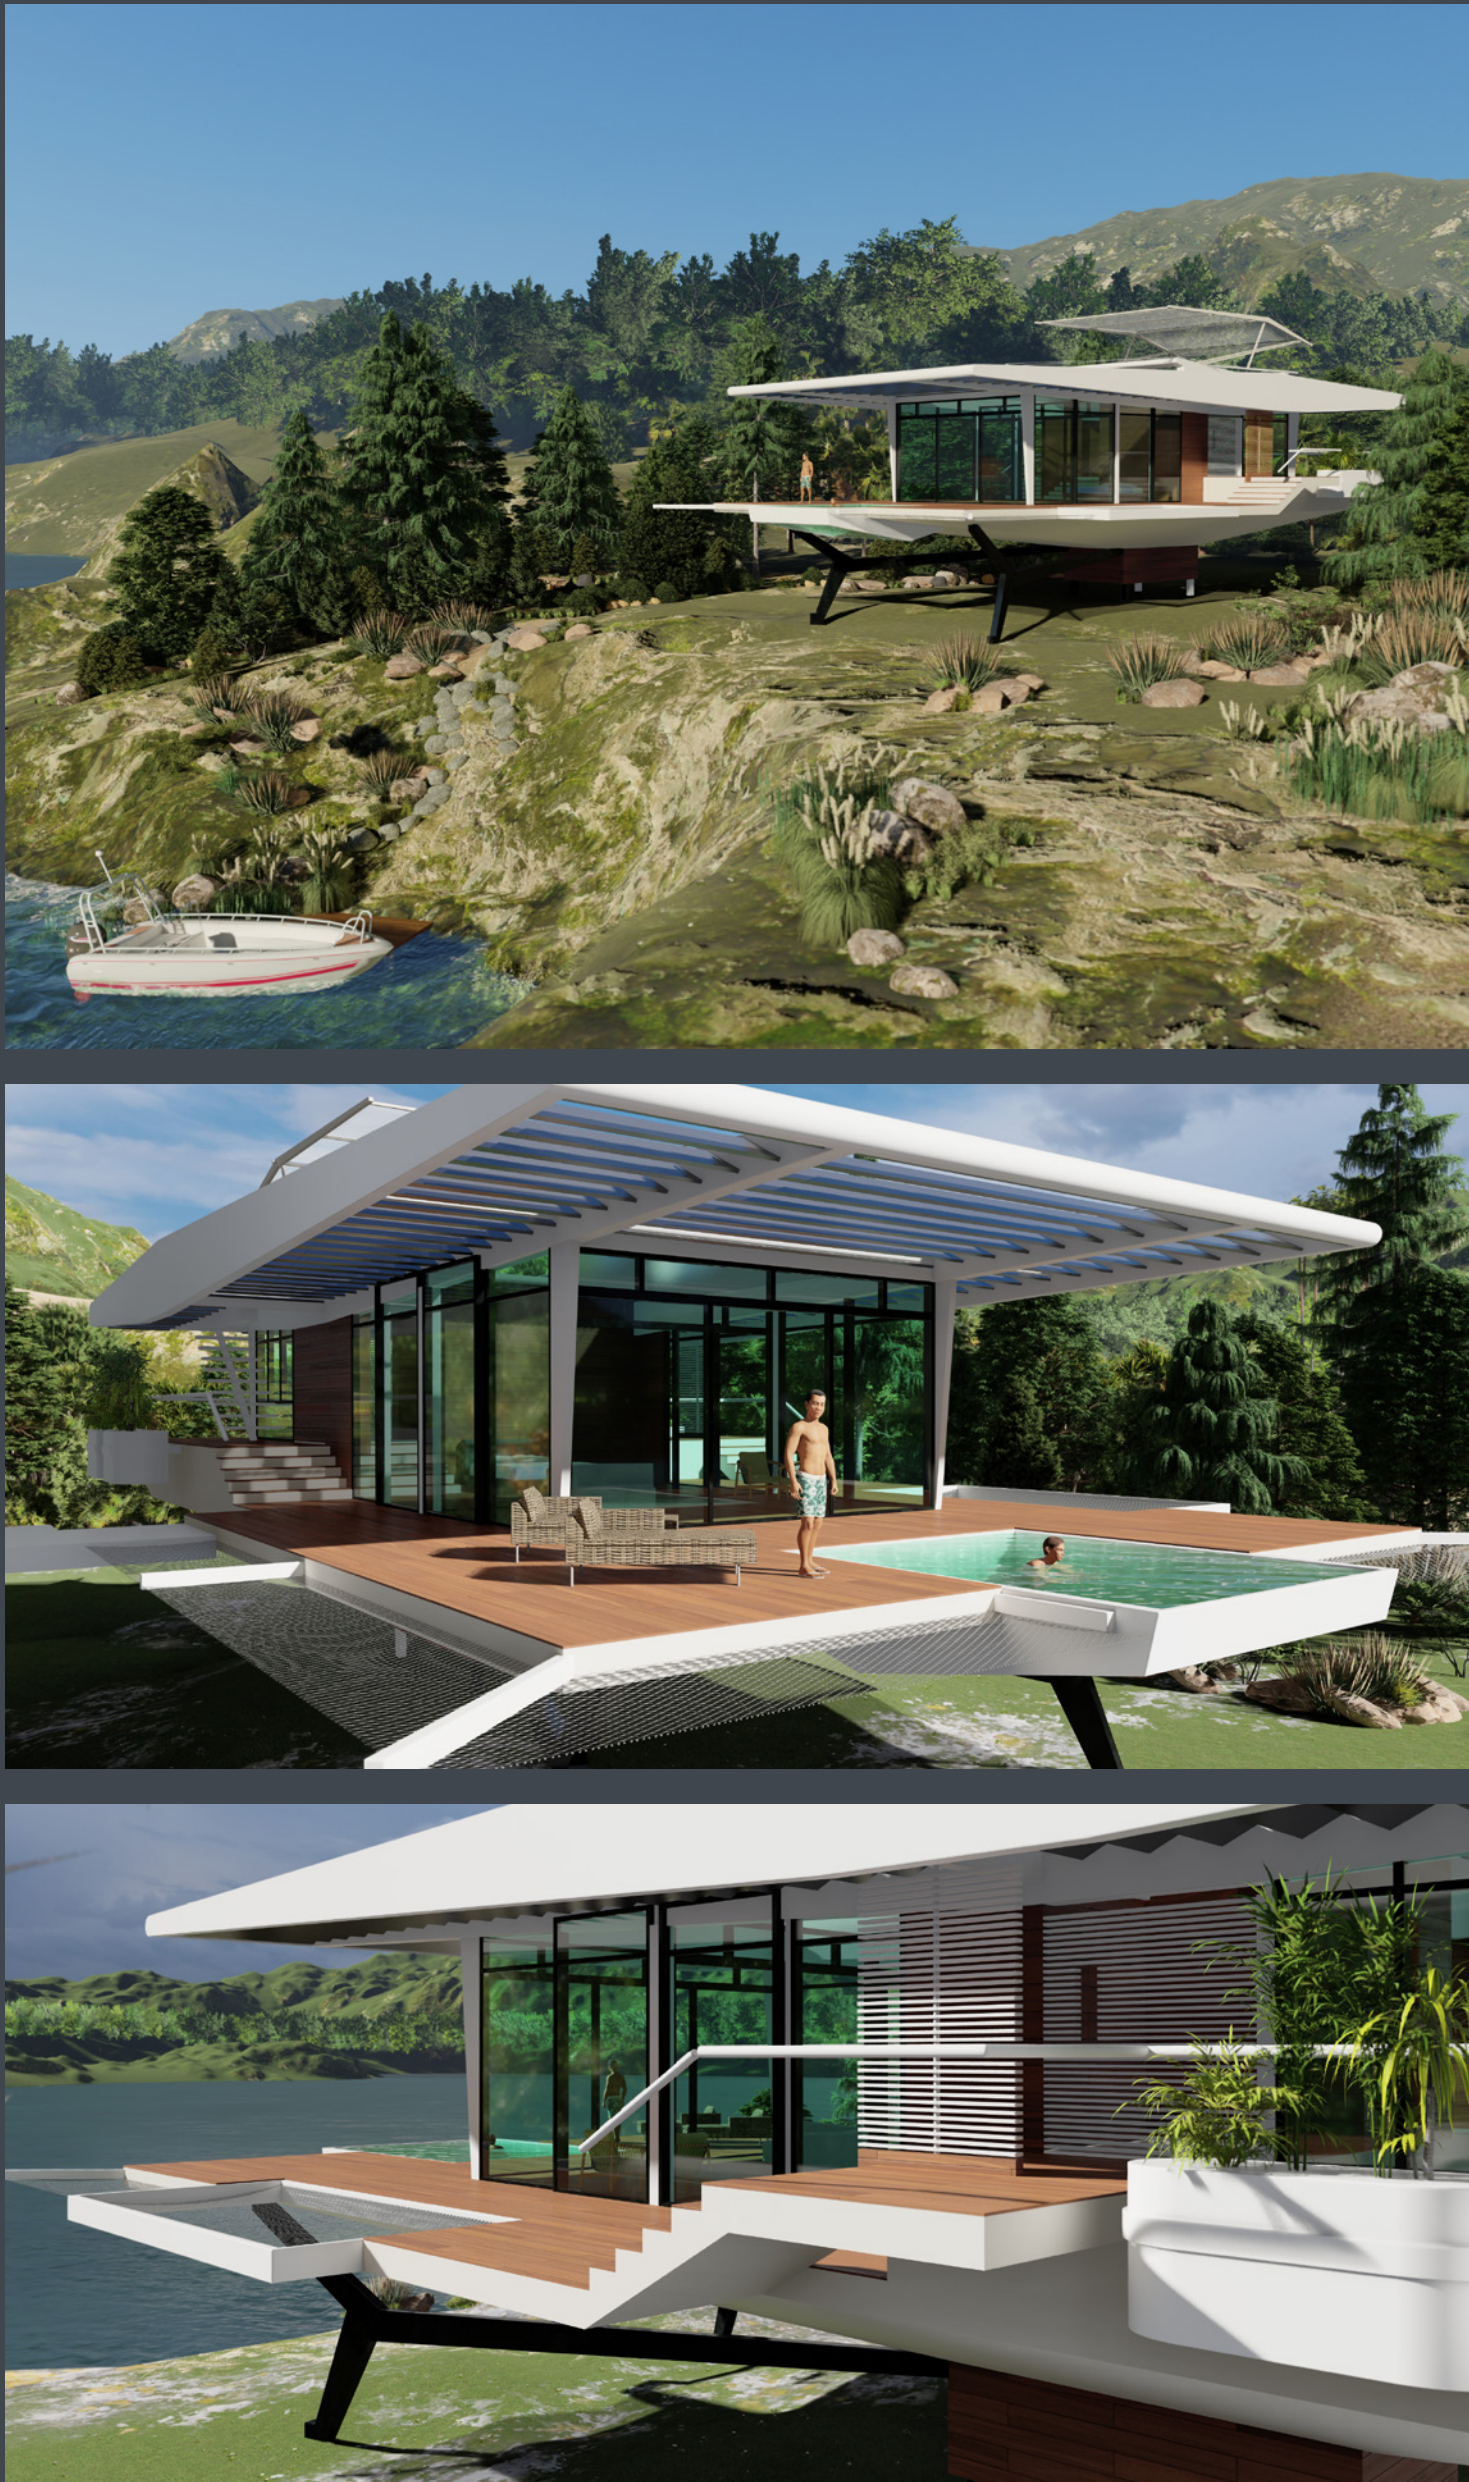

HABITÄRE S SLIM MODEL
